

Homeowner Notes

One thing we always say about our home is that we use every room in the house almost every day.

Favorite areas of our home and why we so enjoy them:

Front Room Library:

A Winter Retreat where we unwind after work, curl up with a good book or just chat with a glass of wine. It's also a great place to entertain guests and has a very relaxing, welcoming atmosphere.

Kitchen:

Has a professional Viking Stove & Hood Fan, abundant Cabinets and ample Granite Countertops -great for preparing a simple dinner for two or a gourmet dinner for a group of friends. Very bright and cheery!!

Master Bedroom:

Romantic, large, spacious & elegant with a peak-a-boo ocean view. A great balcony that looks towards the ocean to view some of our most beautiful sunsets or just stand out there and marvel at the eagles soaring above.

Rear Garden:

Ahhhh.....One of our favorite and most tranquil summer retreat areas. We live outdoors on weekends & in the evenings from the moment we come home from work. The expansive deck overlooks our remarkable monochromatic white garden & the meandering pathways that lead to a European style courtyard and soothing waterfall feature... the perfect spot to relax and entertain.

Garden shed/workshop:

This looks more like a miniature house with specially chosen 'Antique windows' to provide a charming addition to the garden. Cleverly tucked into the landscaping it never fails to draw and please the eye.
