## **FENG SHUI BACKGROUND & SPECIFICATIONS**

I declare this home to be 'Feng Shui Approved' after conducting a Classical Feng Shui analysis on this property, using the Flying Star School in combination with the Form School teachings. In my experience, Classical Feng Shui and the Flying Star School are the most accurate mathematical formulas for remedying any challenges & discovering positive impact that the earth & planetary energy, Chi, has on every building. Classical Feng Shui is the original 3000 year old art form that was created and taught by and to the monks of ancient China.

This house is Wu S2 facing, compass reading of 174 degrees, in the time period of 8.

The true traditional practice of Feng Shui is very unlike many of the superstitious beliefs that some people think is real, passed down over the generations. Modern day Chinese are aware that the old superstitions do not hold true as they once did in the past, allowing the true art of Feng Shui to do its powerful work, separating fact from fiction.

## **FINDINGS & REMEDIES**

This is a beautiful property, with traditionally auspicious Feng Shui in the exterior landscaping. The land has all the necessary forms around to ensure its protection and prosperity: There is a 'Black Turtle' at the back- a mountain or hill behind. The 'Green Dragon' and the 'White Tiger' are present on the east and westsides- the hedging and shrubbery provide the necessary height and enclosure. Finally, there is a "Red Phoenix' in the front of the house- the island/ land mass across a bed of water. All these mystical animals symbolize the balance the land has, providing abundant wealth, stability and harmony for this property.

On site, the property is also well balanced. There are no landforms that have any 'Sha Chi'- negative Chi on this property and house- no T junctions, cul-de-sacs, protruding land masses and sharp corners pointing at the property.

When realizing the 'good' or 'bad' Feng Shui of a home, one does consider the success of the present owners. The present owners have enjoyed a very successful 5 years on this property, with both parties excelling in their various businesses. They have now excelled so much that it is time to relocate to another part of the world.

After doing the chart analysis of this home, I found the entrance, foyer and partial dining room, to have the auspicious Chi- '7 Water and 9 Mountain star' coming through the windows and doors. I mention Water and Mountain Stars often- this means a combination of Chi that is coming from the heavens and planetary energy together with the Chi from the Earth. In the foyer, this Chi will encourage spiritual growth, travels and wealth. The door placed here is fortunate as residents will walk this wealthy Chi in everyday. The triangle shrubs in red pots feed this zone with supportive Fire Chi. The earth tone red rug in the foyer provides Earth Chi and Fire Chi, both will ground this zone to produce wealth and growth.

The entire side of the home that faces the water is extremely fortunate. This Chi that is coming in from the exterior is the same, whether it is on the Main Floor, Lower Floor or Basement, as long as they share the same zone directly above or below.

The zones occupied by the Living Room, Gym and Family Rooms is the most auspicious zones in this home. How fortunate that family gatherings and other valuable activities take place here, so that everyone can benefit regularly from this auspicious Chi- 8 Water Star and 8 Mountain Star that exists in this zone. The reds in this zone bring Fire Chi that further support the lucky Chi that is coming in through the windows. A water feature has been placed in the Living Room, to encourage continued prosperity and wealth. The water feature will also pull the Chi into the kitchen and eating area, allowing for good health and fortunate family meals.

On the lower level, the bedroom on the Southwest corner of the home has Chi for intelligence, business success and promotions. This is a perfect zone for a young adult in their late teens.

The Living Room on this lower level, like the one above it, also harnesses very lucky prosperous Chi. This is a wonderful zone to nourish and grow one's self in. Since it shares the zone for intelligence and success, this would be a great space for a family library or learning, tutoring zone for the children. Keeping a water feature here is also beneficial.

All other bedrooms in this home have neutral Chi that will benefit with white linens and tones. The layout of the home is such that with the large windows and open plan, the fortunate Chi from the central parts of the home can easily travel through the other zones and support and nourish them as well.

In the Basement, The 8 Water Star and 8 Mountain Star flows right through the large windows and doors. This prosperous Chi is the reason why both owners have succeed so well in their businesses. The office of one business is located in the South West room, where as directly above it, has the Chi for intelligence and promotions. The wellness business that operates on the other end has similarly benefitted tremendously, with the centre of the business run out of the middle room of this level.

## CONCLUSION

This house on this plot of land is an excellent purchase. I do stress that the fortunate Chi of 8 Water Star and 8 Mountain Star located centrally is the most fortunate Chi that one could be lucky enough to have in one's home. The inherent fortunate Chi in the land that this house sits on, in its surroundings, and with excellent Feng Shui within the house, has this be an auspicious home.

In conclusion this is a great purchase, ensuring much prosperity, harmonious family relationships and business success for the new owners, and much scholarly success for the children.
